

ENERGY AUDITOR IN INDUSTRY AND BUILDING ACCORDING TO ISO 17024:2012

RD 56/2016 BRINGS ABOUT A HIGH DEMAND OF PROFESSIONALS, WHO WILL NEED TO ACCREDIT A SPECIFIC TRAINING AND QUALIFICATION IN THE DEVELOPMENT OF ENERGY AUDITS AND THE IMPLEMENTATION OF ENERGY MANAGEMENT SYSTEMS.

The certification of energy auditors is a certificate that guarantees that the certified auditor has the necessary competences to carry out an Energy Audit in Industry and Building.

This certification is issued by the CIRCE Foundation, an entity accredited by ENAC according to ISO 17024: 2012, No. Exp. 14 / C-PE026.

With this certificate, it is possible to meet the requirements for auditors established by the transposition of Directive 2012/27 / EU on energy efficiency, which obliges industries to carry out periodic energy audits.

WHY BE CERTIFIED AS AN AUDITOR?

- ① Because it is the best mechanism to demonstrate the optimal professional qualification, guaranteeing clients that they have the competences, knowledge and skills necessary to carry out energy audits.
- ② Because with this certification is able to perform the work required by companies on energy audits and energy management systems, in compliance with RD 56/2016 on energy efficiency.
- ③ Because this certification has equivalence in other EU countries where the Directive has been transposed in a more "literal" way and this requirement is required (United Kingdom and the title of "Lead Assessor" for example)
